

M365 with legacy servers

Hybrid Networks

The challenge

Many SMB and Enterprise networks are straddling the "legacy" world of on premise servers and the new world of subscription based Microsoft 365 experiences. Doing this right takes intentionality.

What we did

navitend's solid understanding of Microsoft servers, Microsoft 365 licensing and attention to detail brings solid and secure operations to our clients. Some applications are not cost effective to "lift and shift" with legacy software. Blending the on premise applications, cost effective backup and disaster recovery solutions and modern Entra Identity Management is the best approach.

The result

Cost effective and secure operations are available for organizations running in a hybrid manner.

Talk to a person, not a ticket

Tell us what's going on. We'll listen, ask good questions, and give you a straight answer about whether we can help.
