Secure remote access

Insurance Group Agency

The challenge

It is not uncommon for us to take over a network for a client and find that the existing network has one or more security concerns. Such was the case for this larger Insurance Agency that provides corporate, personal and business insurance.

What we did

After getting detailed information around "who" needed access to the network and understanding "how" they operated, we installed and configured an easy-to-use and monitor remote access solution.

The result

This client now enjoys not only a more secure remote access solution, but they now have a periodic review of their administrative roles to make sure only the required workers have access to the network.

Talk to a person, not a ticket

Tell us what's going on. We'll listen, ask good questions, and give you a straight answer about whether we can help.
