

Software selection

Property Management Firm

The challenge

A growing property management firm had outgrown their legacy database and accounting solutions.

What we did

navitend met with the firm's management team to assess both their current needs and their anticipated growth path into the future. Equipped with a solid understanding of where the company is and where they would like to grow, navitend evaluated the available options in the market to identify the software packages that would meet their needs.

The result

After a careful selection process, a vendor was selected and contracts negotiated successfully. Today the new software is deployed and our client is poised for growth with a solid information infrastructure.

Talk to a person, not a ticket

Tell us what's going on. We'll listen, ask good questions, and give you a straight answer about whether we can help.
